No. 1720-C/41 dated 30th September 1941

Sir.

Subject: Government Trades School, Mangalore - Conversion of the two year wood working course into one of five years - Proposals - Submitting.

I submit for the consideration of Government, the following proposals for the conversion of the present two year carpentry course in the Government Trades School Mangalore into a five year course.-

2. The present course in the Mangalore Trade School is of two years duration and this is too short a period for the full syllabus in carpentry to be covered satisfactorily. It is very desirable therefore that the course should be extended to one of five years duration as in the other Government Industrial Schools. I do not know of any school of standing in which the carpentry course has been compressed into such a short period as two years.

3. At present there are ten students in the carpentry section and if these are retained to form the 2nd and 3rd year classes and five more are admitted to the first year, the extra cost will be for the first year, Rs.500 for stipends rising to Rs.1300 in the fifth year, plus Rs.500 extra for materials in the first year rising up to Rs.1000 in the fifth year. Against this there should be an increased receipt of Rs.600 in the first year rising to Rs.1500 in the fifth year.

4. The permanent staff of the school at present consists of one Superintendent, two instructors (one for the Mechanics course and one for the carpentry course) and one clerk. It is proposed to manage the extra classes with the existing carpentry instructor, a workman on daily wages being employed to assist as and when necessary. There is heavy work at present in the school for one clerk and as there is no store-keeper, the stores work is now looked after by the carppentry instructor. If, as is proposed in paragraph 2 above, the carpentry course is converted into one of five years, the instructor will not have the necessary time to devote to the stores work and a stores clerk will be absolutely necessary, as the volume of outside orders has increased considerably since the issue of G.O.No.1705 Home dated 29th March 1937. The Superintendent also states that many orders are now being received from local bodies in accordance with the orders contained in G.O.No.653 Development dated 3rd March 1938.

5. The extra cost involved on account of the above proposals will be as follows:-

Recurring.	1942-43 for 9 months. Rs.	Average cost. Rs.
Stipends for 1st, 2nd, 3rd, 4th, and 5th years @ annas 3, 3, 4, 5, 6 respectively	500	1,300
(Number of students for 1942-43 - 14. Number when the scheme is complete 25. Stipends payable for 10 months only in a year)		
Materials	500	1,000
Other charges (contingencies)	100	100
Tota	,100	2,400
Deduct receipts anticipated	600	1,500
	500	900
One store-keeper on Rs.30-55	270	505
	770	1,405
Non-recurring		
Tools	100	300
Total	870	1,705

5. If my above proposals are approved, necessary provision may be included in Part I of the departmental budget for 1942-43.

for Director of Industries and Commerce.

Subject Education
Industrial - Govt Trade
School Mangalore -
Carpentry Course -
Conversion into one of
five years
From the Dir of Ind no 1720 C/41 dt
30.9.41

In Go no 691 Dev dt 12.4.1929
the Govt sanctioned the
opening of three industrial
schools at Calicut, Bellary
and Mangalore. The schools
at Calicut and Bellary
were full-time schools
with facilities for practical
training while the school
at Mangalore consisted of a
small set of classes to
impart theoretical instruction
for the young men and boys
employed in the various
workshops already
established there Conditions
in Mangalore and the other
two places being three

it would appear that
different to a two years course
was ~~perhaps~~ considered
sufficient for the carpentry
section of the Mangalore
School while a five year
course was prescribed
for this section in the
other two schools.

2. The D/Re has now
suggested that the present
two years carpentry
course should be
converted into a five
years course on the
ground that he does not
know of any school of
standing in which the
carpentry course has
been compressed into
such a short period. ~~as two years~~. He has not
however explained whether
the students trained at Mangalore
years have not acquired
sufficient theoretical
knowledge for/the foundation
when the classes were
started, whether the

~~Conditions of~~ apprentices obtaining in Mangalore have changed, ~~which a fair~~ course is likely to produce ~~a better set of men~~, and whether there is a demand for such training from employers. He is requested to submit a detailed report on these points and also state whether, with reference to ~~the~~ local conditions at Mangalore, there is need for a carpentry course extending over five years.

Enclosures:

No. 1720-C/41 dated 6th November 1941.

Sir,

Sub: Government Trades School, Mangalore - Wood-working Course - Conversion into one of five years.

--

Reference: Government Memorandum No.26733-D/41-1 dated 20th October 1941.

--

The part-time course in wood-working at the Government Trades School, Mangalore, sanctioned in G.O.No.691, dated 12th April 1929 was subsequently converted into a full-time course of the same duration in G.O.No.913, Development dated 7th July 1932, as a change over was found desirable to suit local conditions. After working this system for the past eight years, it is now found that a period of two years is too short to train the candidates as skilled artisans and that they do not develop the skill necessary to enable them to ~~work~~ make a living. The boys who pass out of the school from this class are, for the above reasons, seldom able to satisfy the employers. To remedy this state of

affairs and to make the training given at the school really effective, it is necessary to introduce a five year course as in the other Industrial Schools.

7/11/44

Joint Director of Industries and Commerce.

Development Department.

Education - Industrial - Government Trade School, Mangalore - Conversion of the two year wood working course into one of five years - Proposals.

From the D.I. & C.No. 1720 C/41 dated 30.9.41.

To U.S.

The D.I.C. has submitted a proposal for the conversion of the present two year Carpentary (wood-working) course in the Mangalore Trade School into a five year course. He considers the present two years duration of the course too short for the full syllabus in carpentry to be covered satisfactorily. According to him no school has a carpentry course compressed into such a short period. The Calicut and Bellary schools have courses of five years for carpentry and cabinet working. There is therefore no objection prima facie to the conversion.

Staff. The Carpentry instructor, at present handles the two classes and in addition is looking after the stores work of the school. With the increase in the number of classes to be handled by this ~~lecturer~~ Instructor, he will not be able to attend to the stores work. The Director therefore suggests that a Store Keeper may be appointed. His proposal may be accepted.

3. The cost involved in the conversion will be as follows:-

Recurring.	Ultimate cost.	1942-43 (8 months)
Stipends, materials etc.	2,400	1,100
One storekeeper (Rs 30-35)	505	240
Non-recurring. Tools	300	100
	3,205	1,440
~~Actual~~ Receipts anticipated } Net cost.	1,500	600
	1,705	840

4. The remarks of Finance may be invited.

The note is inadequate. Why was a two years course prescribed for this school also

SJC 6.10.41.

Why 5 years for the Cabinet & Bellary schools? The previous papers ~~had~~ to be looked into & the more ~~the~~ exact part of

If
P

To U.S.

The three schools at Mangalore Bellary and Calicut were started simultaneously with reference to the orders in Go no 691 dtd 12-4-1929 A class of 2 years duration in wood working was suggested for the Mangalore school by the Director himself. vide A at p7 of the Go. at (8) ~~and accepted by him at~~ and accepted by him at p44 (8). The difference was perhaps due to the fact that ~~the Director of~~ in Bellary and Calicut schools ~~the~~ the instructor given is part time while in the Mangalore school, the instruction given

✓ Para 11 p

N. at p 7 (13)

in the same School we suggested a

Dis p 7 j (6) five years Course. The director may perhaps be asked to say why the two years Course was suggested originally and whether a five years course is absolutely essential if draft one is submitted

See Minute The difference was due to the fact that full time industrial Schools were established in Cochin & Bellary while in Mangalore it was considered sufficient to set up small set of classes for the journeymen & boys employed in the various workshops already functioning there. To set up a pucca workshop in Mangalore would have meant Government competition with the small organizations already established there & this was considered undesirable. The D. should state whether conditions have changed since as it is, his only argument in favour of his proposal is a theoretic one, namely that he does not know of any School

To us

This file deals with the proposal of the DIC for the conversion of the present two year carpentry in the Mangalore Trade School course into a five year course. The course originally sanctioned in GO no 691 Dev dt 12.4.29, was part time. ~~one~~ was later converted into a full time of two years course. The Joint Director agrees with the DIC that there is real need for the conversion into a five year course, as past experience

(Ei.

⊗ This should have pointed out first. 13.11

p 8 C.F

A - p. 7 c.f. has shown that a period of two years is too short to train the candidates as full artisans. It is also stated that the boys who pass out of the two years' course rarely satisfy their employers. The Point is then not however reported on the other points raised in the memo at p2-5 c.f. viz whether there is local demand for such training from the employers and whether the conditions of apprenticeship at Mangalore have changed since 1929.

A - 1 p5 - f

It is for orders whether the P.W. Director's proposal will be accepted. The cost involved is given at p2 c.f. The views of Finance may be invited.

ay be accepted for the reasons stated at A on p. 7 c.f. The proposal may be treated as a normal activity of the dept.

Finance (E.II)

33970 E II

The proposal is to convert the present 2 years' course in wood working in the Govt. Trades School, Mangalore into a 5 years' course in carpentry as in other Industrial schools at Madura, Calicut and Bellary

The proposal involves a net extra cost of Rs 1,405 recurring and Rs 300 non-recurring as shown belo

p. 2 cf

Recurring..	ultimate cost Rs
1 storekeeper on Rs 30-o5	505
Stipends for 1st, 2nd, 3rd, 4th and 5th years students at Annas 3, 3, 4, 5 and 6 respectively	1,300
Materials	1,000
Other charges (contingencies)	100
Total	2,905
Deduct Receipts anticipated	½ 1,500
Net cost	1,405
Non-recurring	
Tools	300

The present 2 years' course was originally introduced as a part-time course in 1929 in view of the consideration that it would not be advisable for the Govt. to compete with small organisations already established there and later converted into full time course in 1932. The object of the Govt. school was to provide instruction to apprentices employed in the local workshops who had no facilities for theoretical training. The course therefore consisted only of giving instructions in the preparation of drawings and designs of various kinds of furniture and other wood work and also class room instructions in theoretical principles of joinery and wood working.

The Director now reports that a period of 2 years is too short to train the candidates as skilled artisans and that the boys who pass out of the school are seldom able to satisfy the employers and that therefore if the training is given at the school is to be really effective,

the introduction of a 5 years' course as in other Industrial schools is necessary. In the circumstances expalined the necessity for the proposal may be accepted.

Appointment of additional staff. The Director xxxx states that the extra classes can be managed with the existing carpentry instruction, a workman on daily wages being employed to assist as and when necessary; but that the employment of an additional clerk is absolutedy necessary to deal with stores, which is now being attended to by the Instructor, in view of the considerable increase in the volume of orders received from xxxxxx private parties and local bodies. The appointment of a stores clerk on Rs 30 - 55 may be accepted; but it may be suggested that the appointment may be xxxxxxxxx temporary for a period of 1 year in the first instance.

Stipends. It is proposed to restrict the number of admissions in the first year to 5 students so that the total strength xxxxx might be 25 when the scheme is complete and to give them stipends at the rate of annas 3,3,4,5 and 6 for the 1st, 2nd, 3rd, 4th and 5th year respectively. The rates are in accordance with those prescribed in G.O.No.813 Dev. dated 31-3-39 for similar courses in the Industrial schools at Madura, Calicut and Bellary.

Note by the Administrative Department.

The present two years' course in Wood Working in the Government Trade School, Mangalore, was originally introduced as a part-time course in 1929 and later converted into a full time course in 1932. The object of the course was to provide instruction to apprentices employed in the local workshops who had no facilities for theoretical training and therefore it was restricted to the preparation of drawings and designs of various kinds of furniture and other wood work and also class room instructions in theoretical principles of joinery and wood working.

The Director has reported that a period of

two years is too short to train the candidates as skilled artisans and that the boys who pass out of the school are seldom able to satisfy the employers and that the introduction of a five year's course as in other Industrial schools is therefore necessary to make the training effective. This Dept. supports the Director's proposal.

The Director states that the extra classes can managed with the existing carpentry instructor, a workman on daily wages being employed to assist him as and when necessary The stores work is now being attended to by the Carpentry instructor and he cannot attend to this work after the introduction of the five year's course. In view of this and in view of the considerable increase in the volume of orders received from private parties it is necessary to employ a store-keeper on Rs.30-55 per mensem.

It is proposed to restrict the admissions in the first year to 5 students so that the total strength might be 25 when the scheme is complete and to give them stipends at the rate of annas 3, 3, 4, 5 and 6 for the 1st, 2nd, 3rd, 4th and 5th year respectively. The rates are in accordance with those prescribed for similar courses in the Industrial schools at Madura, Calicut and Bellary.

The cost of the scheme and the receipts anticipated from the new course will be as shown in the summary at the beginning of this note. This Dept. recommends the inclusion of a provision of Rs.1400/- in the budget estimates of 1942-43.

9/6.12.

Part II Scheme for 1942-1943

Subject

Conversion of the two years wood working Course in the Govt Trade School at Mauritius into four Year Course.

Summary

Head of account (Major and minor heads)	Nature of expenditure	Estimated Cost Rs. NR	
a. Industries - Industrial Industrial Schools.			
Pay of Establishments - Authorised (Temporary)	one Store keeper. (30-55)	505	240 or 200
School and staff Stipends - Authorised	stipends for 1st 2nd 3rd & 4th & 5th Year Students	1300	500
Other charges - Authorised - Apparatus and Materials)	———	1000	500
	Contingencies	100	100

employed in the local workshops who had no facilities for theoretical training & therefore ~~the course hitherto consisted only of~~ giving instruction in the preparation of drawings and designs of various kinds of furniture and other wood work and also class room instructions theoretical principles of joinery and wood working

The Director has reported that a person of two years is too short to train the candidates as skilled artisans and that the boys who pass out of the school are seldom able to satisfy the employers and that ~~therefore~~, if the training given at the School is to be ~~really effective~~ the introduction of a three years course as in other Industrial schools is necessary. This Dept supports the Directors proposal

P 7 CF

The Dir. further states that the extra classes can be managed with the existing carpentry instructor, a workman on daily wages being employed to assist him as and when necessary. The stores work

is now being attended to by the carpentry instructor and he cannot attend to this work after the introduction of the five years course in view of this and in view of the considerable increase in the volume of orders received from private parties it is necessary to employ a clerk on Rs 30-35 p.m.

It is proposed to restrict the admissions in the first year to 5 students so that the total strength might be 25 when the scheme is complete and to grant them stipends at the rate of annas 3, 3, 4, 5 and 6 for the 1st, 2nd, 3rd, 4th and 5th year respectively. The rates are in accordance with those prescribed for similar courses in the Industrial Schools at Madura Cuddapah and Bellary.

The total cost of the scheme is Rs 2905. Recurring and Rs 300 non-recurring. Against this a receipt of Rs 600 in the first year rising to Rs 1500 in the fifth year is anticipated. The Depts recommends the inclusion of provision of Rs 140 in the budget estimates for 1942-43.
